

# Fluid Fax server

Go green with the ideal fax gateway solution for Windows 7, Vista, XP, 2008, 2003, 2000

## Where can I install Fluid Fax server on my network?

Fluid Fax server can be installed on any computer which meets the minimum requirements irrespective of the location on your network.

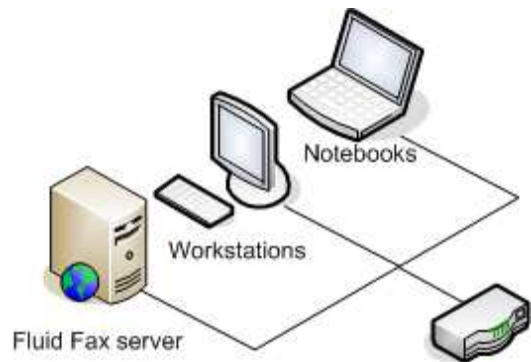

## How do I deploy Fluid Fax server?

Fluid Fax server can be deployed in 3 different modes, either by standalone or by integrating with a mail server.

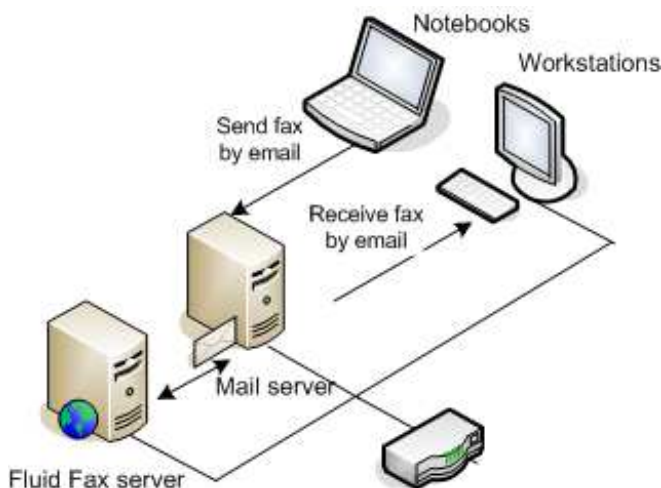

### 1. Simple mode

It is not connected to any email server. Users use the Fluid Fax server web interface to send and receive faxes.

### 2. With internal email server

Users send and receive faxes using an internal mail server such as MS Exchange, Lotus Notes or SMTP server.

### 3. With external mail server

The mail server is hosted externally. Users send faxes directly to the Fluid Fax server. Faxes received by Fluid Fax server will be forwarded to the external mail server.
