

Web based

Fluid Monitor can be accessed via any web browser without the need to install any client software to view the logs of GFI FAXmaker.

Windows 7 & Vista

Fluid Monitor can be installed on Windows 7 and Vista. This eliminates the need to purchase expensive Windows server software.

Fax broadcast

Perform fax boardcast simply by uploading a text file containing the fax contacts. This feature is very useful for sending out promotion materials by fax.

Monitor services

Allows administrators to monitor the status of GFI FAXmaker windows services using a web browser. If any of the windows services is down, an administrator can start and stop the services via a web browser instead of connecting to the fax server directly.

View faxes via the web interface

Currently, the logs of GFI FAXmaker are saved to a text file or a database. Users are notified by emails when faxes are sent and received. With the proliferation of web browsers, there is a need for a web interface for GFI FAXmaker. A web interface will greatly increase the convenience of users accessing the fax logs.

Fluid Monitor allows users to view received and sent faxes from GFI FAXmaker using any web browsers such as Internet Explorer or Firefox. Users can also send out faxes using a web browser.

Personal copies of faxes

Users can maintain personal copies of their sent and received faxes without affecting the faxes of other users. Users can also organize the faxes into different main and sub folders.

Automatic housekeeping

Schedules can be set to automatically delete the centralized logs of all received and sent faxes from GFI FAXmaker's database. It can also automatically compact the database thereby reducing the amount of space required. This helps to make the administration of GFI FAXmaker a hassle free affair.

Fluid Monitor

System requirements

- Windows 7, Vista, XP
- Windows 2008, 2003
- Processor: 800MHz or higher
- Memory : 256MB

More features

• Contacts and distribution lists

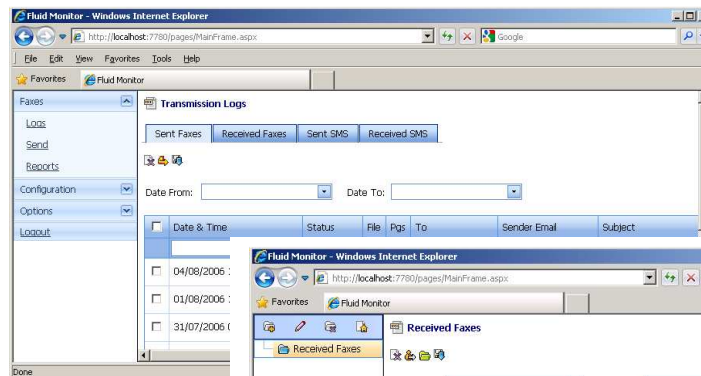

Users can maintain global and personal contacts and distribution lists for faxing. Users can choose to fax to a single recipient or a group of recipients easily.

• Summary reports

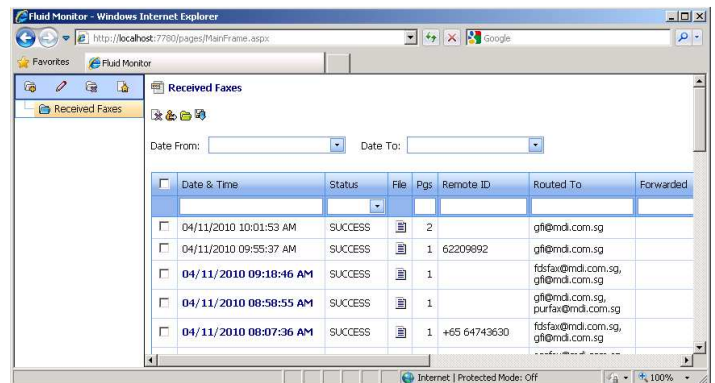

Administrators can generate summary reports of faxes sent and received per line and per user over a period of time. This helps to determine the amount of usage of the fax server and also helps in cost accounting.

• Minimum administration

Fluid Monitor is easy to install and configure with minimum administration.
